Plant List for Sale

Mount Lofty Botanic Gardens

Date - Sunday 27 September from 10.30 am to 1.30pm
Location - Chris Steele-Scott pavilion

Spring is with us now and more plants are ready for planting. As well as the list below there will be some wonderful flowering plants from the Nursery which will brighten up any garden.

The Aquilegias are very advanced plants that have their flower stalks developing, and as such are ready to be planted out or kept in a large pot for display. The Deutzias are small but coming into bloom and should go on and develop well. For those with a dryer and warm site there are some advanced Eremophilas.
